EDIConnect

sales@astera.com | 888-77-ASTERA

Introduction

EDIConnect is a complete electronic data interchange (EDI) solution that takes advantage of Astera's core expertise in extract, transform, load (ETL) technology to efficiently and cost-effectively process EDI data. EDIConnect parses or constructs data from a wide variety of sources using built-in capabilities for incoming file translation, outgoing transaction construction, acknowledgement generation, process orchestration, and scheduling. Included with EDIConnect are a translator, a transaction builder, advanced transformations, a validator, a partner manager, and a repository manager.

Easy Data Integration

Key Features

- Intuitive user interface with visual tools to build bi-directional integration
- Incoming file translation and ingestion with built-in transaction sets
- Advanced data mapping, validation, and correction capabilities to better manage data ingestion
- Fast and easy outgoing transaction construction
- Acknowledgement generation
- Automation, process orchestration, and job scheduling

EDIConnect Benefits

Seamless, Unified Environment

A single unified platform for EDI source extraction, translation, acknowledgment generation, verification, and sending data to its destination.

Easy to Use

Visual drag-and-drop, code-free environment designed especially for non-technical business users.

Easy to Use

Enables customization of transactions, segments, elements, and validations.

High Performance

High-performance, parallel-processing engine designed to handle extremely large volumes of data.
