

ETL your data with Astera Centerprise's Azure SQL Database and cloud connector

ABOUT ASTERA SOFTWARE:

Established in 2009, Astera Software focuses on providing scalable solutions that enable businesses to spend less time on data extraction and integration and more time on using the transformed data to make data-driven business decisions.

What our customers are saying

"I'd say that instead of 50 percent of our time doing the translation, we now use 10 percent of it, only because Centerprise is so fast at changing and testing things."

– Patrick Van Vlierberghe, IT Manager, CRC Industries

WHAT WE OFFER

Astera Centerprise is an enterprise-ready, end-to-end data integration solution that enables organizations to integrate, cleanse, transform, and load data inside a code-free, drag-and-drop environment.

Astera Centerprise provides businesses with uninterrupted data delivery by employing an industrial-strength parallel-processing engine; support for extract, transform, load (ETL) and extract, load, transform (ELT) operations; a code-free, drag-and-drop interface; more than 200 built-in transformations; and the capability to orchestrate and automate workflows.

Astera Centerprise widely leverages Microsoft ADO.NET and .NET drivers to access data and data services. Users can connect to Azure SQL Database and integrate their data into multiple cloud platforms, cloud storage, databases, and data warehouses.

Why Azure?

Be future-ready

Continuous innovation from Microsoft supports your development today, and your product visions for tomorrow. With 1000+ new capabilities in the past year, you can build on the latest advancements in AI, blockchain, Kubernetes, containers, and databases to keep you ahead of the curve.

Our enterprise grade analytics solution outperforms the competition, costs less, and is fully compatible with your existing development, BI, and data-science tools.

Operate hybrid seamlessly

On-premises, in the cloud, and at the edge—we'll meet you where you are. Integrate and manage your environments with tools and services designed for hybrid cloud.

Enhance security, simplify access, and set smart policies across your different environments with a single-identity platform trusted by 90% of enterprises globally.

Build on your terms

You have choices. With a commitment to open source and support for all languages and frameworks, build and deploy how you want to. Take advantage of the full-featured, integrated development environments with built-in support Visual Studio and Visual Studio Code, the most popular IDEs trusted by 15M+ developers.

We embrace open source, drive innovation through collaboration, and contribute back to the community.

Trust your cloud

Get security from the ground up, backed by a team of experts, and proactive compliance trusted by enterprises, governments, and startups.

With a \$1b+ investment in security R&D and 3,500 cyber security experts, security is foundational for Azure.

Microsoft Azure is an ever-expanding set of cloud computing services to help your organization meet its business challenges. With Azure, your business or organization has the freedom to build, manage, and deploy applications on a massive, global network using your preferred tools and frameworks.
